TRANQUILIT ALL TERRAIN

Slim Rugged - Intel 7th Gen Mobile - IP51

A tiny foot print, ideal for the most restricted spaces where only the smallest will do!

Our smallest range of computers! The Slim Rugged was designed to sit flush on a wall behind a screen: it was developed for digital signage applications, where space was the main constraint. The heat pipe cooling solution made it possible to reach optimal passive cooling without compromising performance in this very small footprint.

Key benefits of FANLESS and RUGGED computers

No fans obviously means no noise, but it's not the only benefit!

No fans allow an important decrease in power consumption, making our products more sustainable!

A fanless computer eliminates the risk to draw in dust and dirt from the environment, the cause of potential failures and costly downtime.

The absence of moving parts enable our products to resist shocks and vibrations, for an increased reliability.

They are built to withstand harsh and constrained working conditions.

High Ingress Protection (IP) rating, indication the protection level of products against both solid and liquids in electrical enclosures.

The in-house designed and milled aluminium chassis is optimized for efficient passive cooling and durability. Its conception proved their reliability in extended operating temperatures.

The aluminium used for the chassis production is repurposed and recycled, and the production waste is recycled too!
